POLICY STATEMENT:

I. The Health Plan provides benefits for land/ground ambulance services in accordance with the New York State mandate, where applicable.

II. When the New York State mandate does not apply medical necessity of land/ground ambulance services will be based on the following criteria:

   A. **Emergency Ambulance Transportation**: Ambulance services for the emergency transportation of patients with suspected emergency conditions are considered medically appropriate and eligible for coverage when all the following criteria are met:
      1. The services must be provided by an ambulance service issued a certificate under the New York Public Health Law;
      2. The ambulance must have the necessary patient-care equipment and supplies;
      3. The patient’s condition must be such that any other form of transportation would be medically contraindicated; and
      4. The patient is transported to the nearest hospital with the appropriate facilities for the treatment of the patient’s illness or injury.

   B. **Urgent Ambulance Transportation**: Ambulance transportation for patients with suspected urgent conditions is considered medically appropriate and eligible for coverage when all the following criteria are met:
      1. The patient is unable to get up from bed without assistance,
      2. The patient is unable to ambulate, and
      3. The patient is unable to sit in a chair or wheelchair.

   C. **Non-Emergency Ambulance Transportation**: Non-emergent medical transport services by a licensed ambulance service with the necessary patient care equipment and supplies, are considered medically appropriate and eligible for coverage between facilities when the transport is any of the following:
      1. From a non-participating hospital to a participating hospital;
      2. To a hospital that provides a higher level of care that was not available at the original hospital;
      3. To a more cost-effective acute care facility; or
      4. From an acute care facility to a sub-acute setting.
   
   The patient’s condition is such that another form of transport would be contraindicated; and the provider of the specialized service is the nearest one with the required capabilities.

   D. The non-emergent medical transport of a bed-confined patient, when specialized medical services during transport are not necessary, is considered to be a non-ambulance transportation and is ineligible for coverage as non-ambulance transportation, such as ambulette, van or taxi cab is generally excluded by contract.

   E. Transportation services utilizing vehicles that are not equipped and certified under the New York Public Health Law to provide emergency medical services (e.g., ambulette, van or taxi cab) are ineligible for coverage as they do not provide medical care or monitoring during transportation.
F. Ambulance services for deceased members may be eligible for coverage if the patient is legally pronounced dead after the ambulance is called, but before pick-up or en route to the hospital. These services are ineligible for coverage if the patient is pronounced dead before the ambulance is called.

Refer to Corporate Medical Policy # 11.01.06 regarding Air Ambulance services.

Refer to Corporate Medical Policy # 11.01.18 regarding Interfacility Transfer of a Registered Inpatient.

**POLICY GUIDELINES:**

I. Elective or convenience ambulance transportation (e.g., patient/patient’s family desire, transportation from one facility to another facility within the same health care system for capacity management) is not medically necessary.

II. When the New York State mandate does not apply to ambulance transportation, contractual distance restrictions may apply. Refer to the member’s subscriber contract regarding specific limitations.

**DESCRIPTION:**

Ambulance services involve the assessment and administration of care to the ill or injured patient by specially trained personnel and transportation of the patient in specially designed and equipped vehicles within an appropriate, safe and monitored environment. The emergency medical personnel, ambulances and equipment must follow New York State laws, codes, rules and regulations not addressed in this policy. Ambulance services are frequently the initial step in the chain of the delivery of medical care.

Ambulance and medical transport may involve:

I. The emergency transportation of a patient to the nearest hospital with the appropriate facilities for the treatment of patient’s illness or injury; or

II. The non-emergent medical transport of a registered hospital inpatient to another location to obtain medically necessary, specialized diagnostic or therapeutic services.

Ambulance services are rendered for emergent, urgent or non-emergent reasons.

I. An **Emergency Condition** is defined as services for a medical or behavioral condition that manifests itself by acute symptoms of sufficient severity, including severe pain, such that a prudent layperson, possessing an average knowledge of medicine and health, could reasonably expect the absence of immediate medical attention to result in:

   A. Placing the health of the person afflicted with such condition or, with respect to a pregnant woman, the health of the woman or her unborn child in serious jeopardy, or in the case of a behavioral condition, placing the health of such person or others in serious jeopardy;

   B. Serious impairment to such person’s bodily function; or

   C. Serious dysfunction of any body organ or part of such person; or

   D. Serious disfigurement of such person.

II. **Urgent** services are defined as services for a medical or behavioral condition that require immediate attention, although the condition may not be an emergency situation. An urgent care condition has the potential to become emergent in the absence of treatment.

III. **Non-emergent** services are defined as services for a medical or behavioral condition that are not considered to be of an emergent or urgent nature (e.g., elective surgery).

On January 1, 2002, (Current May 2017 NYS L § 4303) New York State mandated coverage for pre-hospital emergency services and land transportation provided by ambulance services certified under the Public Health Law. The mandate provides coverage for such ambulance services when a prudent layperson, possessing an average knowledge of medicine and health, could reasonably expect the absence of such transportation to result in:

I. Placing the health of the person afflicted with such condition (or with respect to a pregnant woman, placing the health of the woman or her unborn child), in serious jeopardy, or in the case of a behavioral condition, placing the health of such person or others in serious jeopardy;
II. Serious impairment to such person’s bodily function;  
III. Serious dysfunction of any bodily organ or part of such person; or  
IV. Serious disfigurement of such person.

The mandate does not require coverage of air ambulance services and explicitly excludes ambulance transportation between hospitals or health care facilities.

The mandate applies to all major medical or similar comprehensive-type contracts, including HMO contracts and Child Health Plus contracts.

**CODES:**

**CMS COVERAGE FOR MEDICARE PRODUCT MEMBERS**

Based upon review, ambulance services are not addressed in a National or Local Medicare coverage determination or policy. However, ambulance services are addressed in Chapter 10 of the Medicare Benefit Policy Manual. Please refer to the following website for Medicare Members: http://www.cms.hhs.gov/manuals/Downloads/bp102c10.pdf.
